Caio Tolio Cavalli

Italy | +39 351 398 5208 | caiotoliocavalli@gmail.com | www.caiocavalli.com

Professional experienced in PHP integration and development and in problem-solving data analysis. Experienced in development, monitoring, and project management. Analytical mindset to identify improvement opportunities and ensure compliance with quality standards. I am ready to apply my skills to the technology sector and contribute to strategic and efficient projects.

PROFESSIONAL EXPERIENCE

PHP Developer - Junior | Napkinn 2024 - 2025

- Corrective and evolutionary maintenance on proprietary PHP systems, with improvements to stability and usability.
- Tech stack: PHP, MySQL, Bootstrap, and jQuery, with incremental releases and regression testing.
- Evolution of a production project with database modeling and ETL routines on clinical data.
- Parameterized queries by reporting period to generate prevention alerts.
- Brand identity consistency preserved; front-end usability improved with Bootstrap and jQuery.
- Integration of Scamalytics APIs into the form-validation flow to strengthen anti-fraud filtering.
- Checks on IP, Fraud Risk Score, Block Romance Scammers, and Bot Detection, with full logging in the database.
- Monitoring by IP and risk reports by level and time window, with no impact on the existing UX.
- Contact process better protected against fraud and automation, with greater operational traceability.

PHP Developer - Junior | Nida Digital 2023 - 2024

- In PHP 7, form processing and email sending with PHPMailer 6, from website submission to internal intake.
- Back-end functionality in PHP 7/MySQL and database integrations in an existing production environment.
- Front-end optimization with Bootstrap and jQuery for responsive design and improved usability.
- Implemented geolocation to serve localized content for international visitors.
- Contact form with logging and IP address capture for monitoring and traffic analysis.
- Responsive, consistent interface; bilingual portfolio, fast to navigate and oriented toward lead generation and traffic measurement.

Data Analyst - Junior| FNK Group 2022 - 2023

- Coordinated multidisciplinary projects using PM methodologies, improving efficiency and measurable outcomes.
- Integrated multi-source data, verifying information consistency and reliability to support operational decisions.
- Developed budgets and financial schedules/timelines, monitoring them to optimize resource allocation.
- Conducted continuous improvement analyses, identifying inefficiencies and data-driven solutions.
- Developed quality metrics and reporting to assess the performance of services and supplies.
- Managed payment flows and cost control, with attention to the economic sustainability of activities.
- Created analytical reports with data analysis tools for strategic support.
- Defined and monitored performance indicators (KPIs), providing insights to improve internal processes.

Architect 2015 - 2022
